NORRBOTTENS  
KOMMUNER

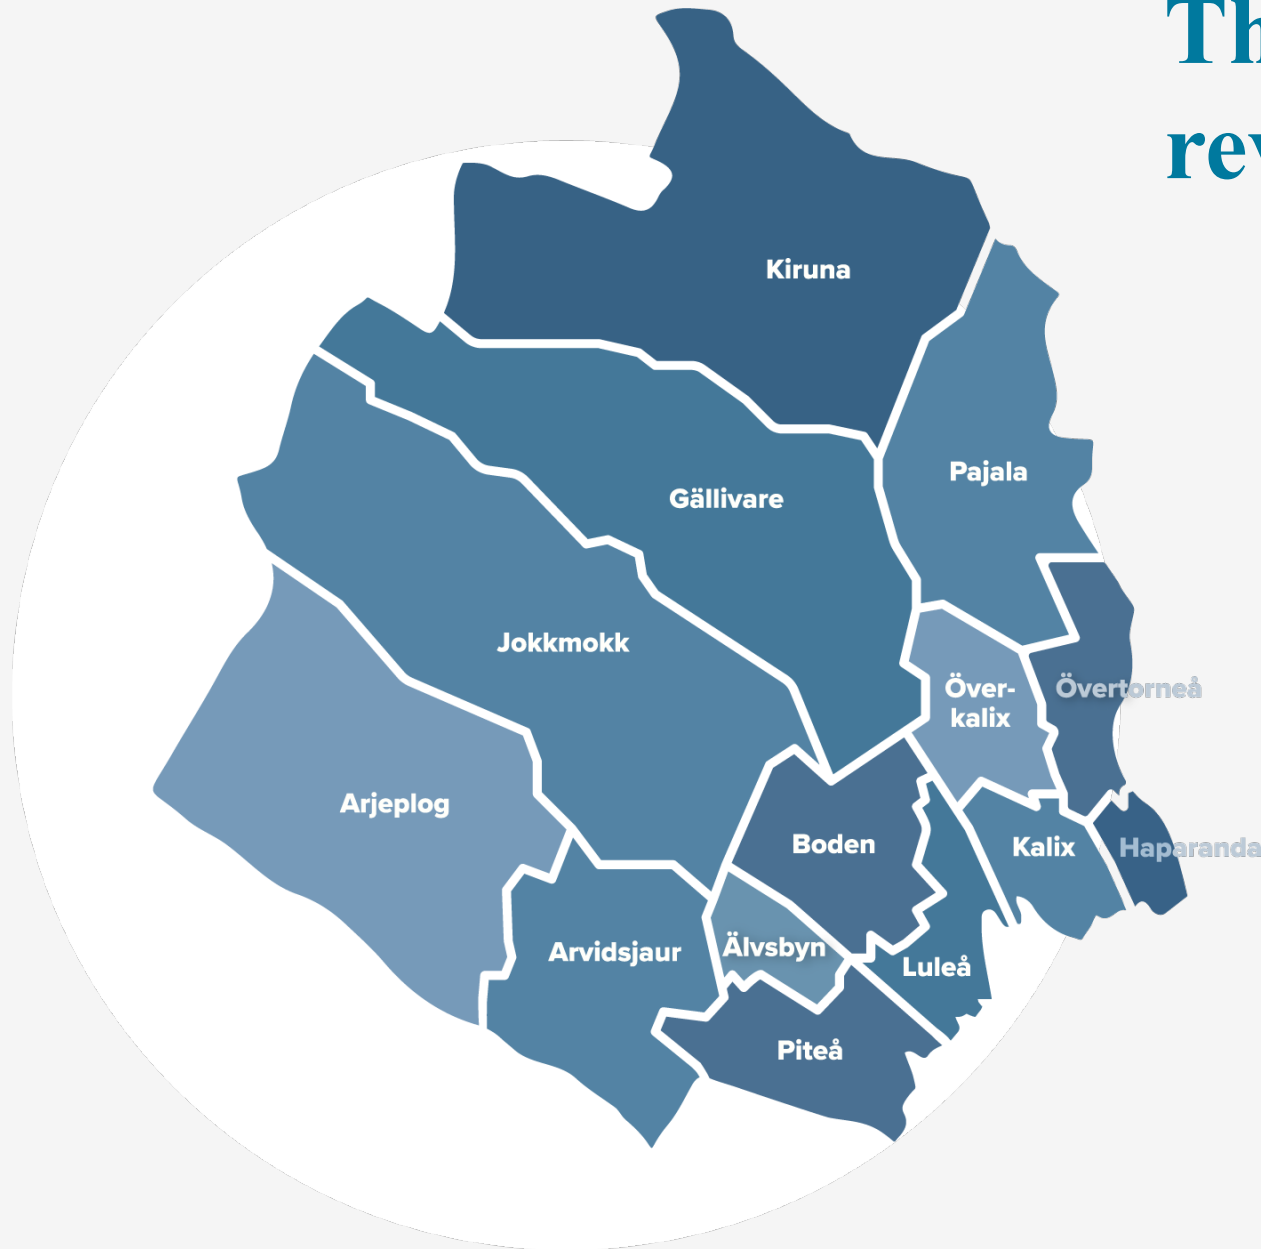

Norrbotten has the ambition to accelerate the green transition by doing.

Our priority is to ensure a sustainable development which includes and benefits everyone living in the region.

# The green industrial revolution in Norrbotten

Norrbotten is a dynamic region with an ongoing transformation to fossil-free base industries.

Our green transition is further fueled by strong, sustainable development in the space, testing and tourism sectors.

NORRBOTTENS  
KOMMUNER

# Decisive factors for a successful transition

- Public service
- Providing development land
- Ensuring social sustainability
- Sufficient infrastructure
- People, people, people

A photograph of a high-speed train, possibly a TGV, captured with motion blur as it travels along tracks. The train is white with red and grey accents. It is passing a yellow station building with a sign that reads 'ÅLVSTYN'. Several people are standing on the platform. The scene is set during the day with a clear blue sky and some trees in the background. Overhead power lines and support structures are visible above the tracks.

# Ten years down the road

# A leading, green industrial power house

- Providing sustainable solutions for climate neutrality in other regions

# Major energy producer and user

Clean energy producer and importer-exporter in an increasingly integrated region

NORRBOTTENS  
KOMMUNER

## Promoter of regional integration

Green transition spillover and geopolitical incitements will drive integration in security, infrastructure and markets for a more resilient EU

NORRBOTTENS  
KOMMUNER

A complex transition requires nuanced action.

Thank you for your time!
