

POLYCE - Metropolisation & Polycentric Development in Central Europe

Polycentric Territorial Structures and Territorial Cooperation: What, where and how?

ESPON Workshop Brussels 14 September 2016

Permanent Representation of the Republic of Slovakia to the EU

Paul Grohmann, City of Vienna

POLYCE Partners

Stakeholder Cities

- Bratislava, Budapest, Ljubljana, Prague, Vienna (Lead Stakeholder)

Lead Partner

- Vienna University of Technology

Project Partners

- University of Ljubljana
- Slovak University of Technology Bratislava
- University of Szeged
- Czech Technical University in Prague
- University of Prague
- CEPS - Centre for Populations, Poverty and Public Policy Studies, Luxembourg
- Politecnico di Milano

Project Duration

- 10/2010 - 06/2012

Objectives

Practical knowledge

- Polycentric situation in the Danube Region
- Governance initiatives
- Metropolitan strategies

Relation between metropolisation and polycentric development

- Definition of concepts
- Influence on urban growth and positioning
- Impact on competitiveness and inclusion

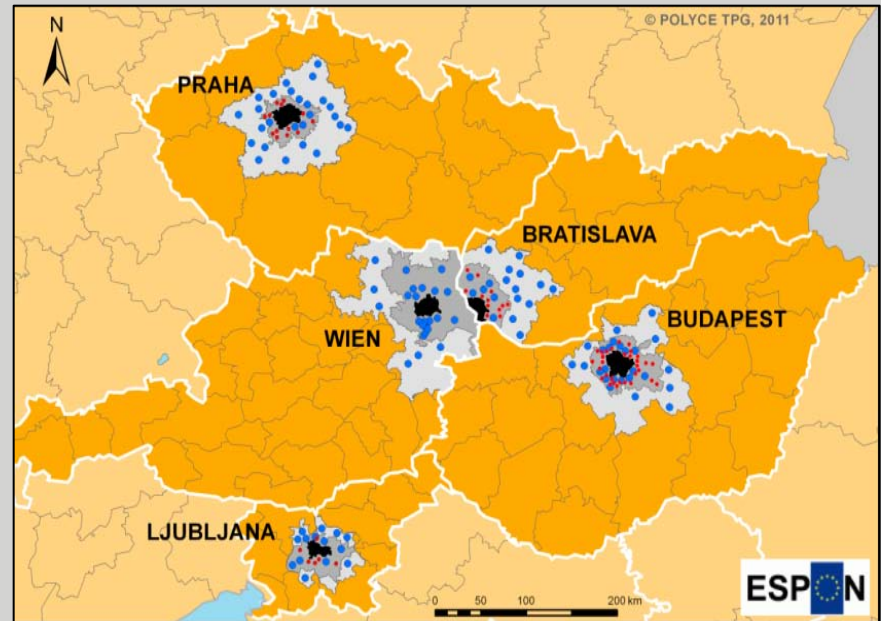

Recommendations for future urban development

- For the 5 metropolises & within Central Europe
- Strengths and weaknesses as urban preconditions (metropolitan profiles)
- Most relevant activities (stakeholder discussion)
- Recommendations for competitive and inclusive development within and between metropolises
- First recommendations for the wider Danube Region

Findings

Empirical study for the five cases showed that

- **morphological and functional polycentricity have to be considered**
- **spatial development shows different conditions but similar challenges (urban sprawl, accessibility, land use)**

Findings

- **lack of strong common polycentric vision and activities between all five metropolises**
- **a lack of polycentric development will negatively influence further demographic or economic growth**
- **profiles and stakeholder discussion are indicating specific assets for positioning and future strategic endeavors**

Recommendations

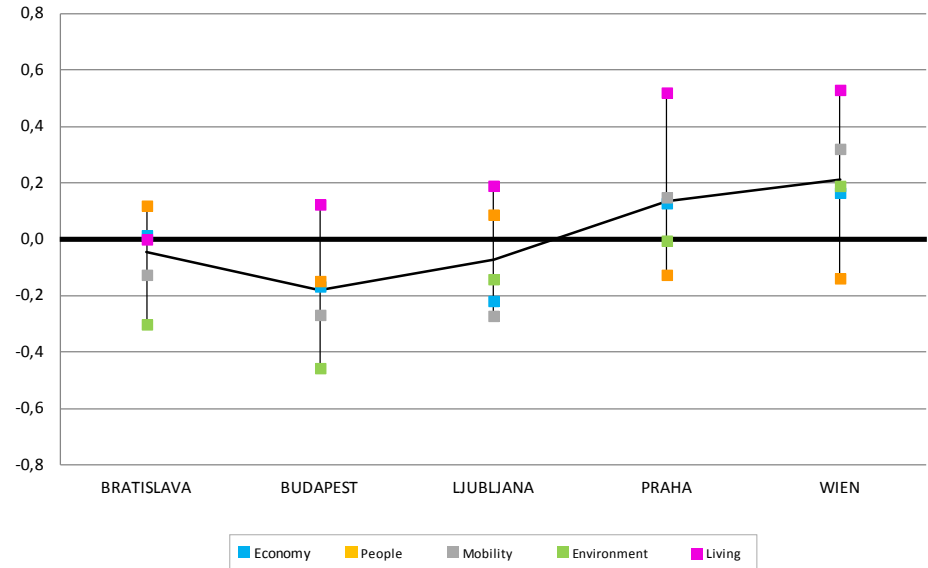

→ enforce and rely on cooperation of different stakeholders (including researchers) within metropolitan regions

Recommendations

→ aim at a mix of strategic endeavors (agenda) steering the process of competitive and/or inclusive development in front of metropolitan profiles

Profiles of the 5 POLYCE Metropolises

Recommendations

... strengthening the urban/metropolitan system in Central Europe / Danube Region

- Create a basic common vision and common activities regarding the role of the five metropolises for better positioning and lobbying
- Improve and enforce relational capital between stakeholders through improved conditions of cooperation

Recommendations

→ Include other metropolises in the Danube region into cooperative activities of the five metropolises

Thank you.
