ESPON TOOLBOX

Home / Tools & Maps

ESPON TOOLBOX OVERVIEW

Tool development within ESPON 2013 is targeted to the use of policy makers and practitioners at all administrative levels (including cross-border and transnational groupings) and will enable the use of information and data by these particular groups of stakeholders. The ESPON tools contribute to the consolidation of a European research field on territorial development and cohesion.

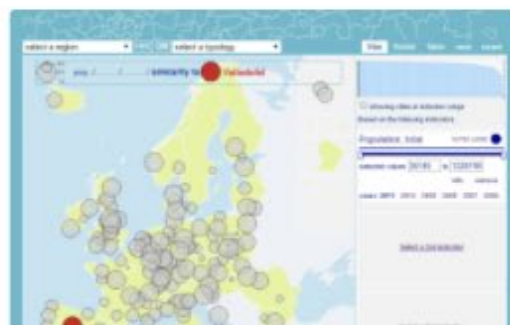

How these tools link to the project groups and the policy makers is visualised in the figure below. The green arrows in this figure show the use for the policy makers and the blue arrows show the flows from the ESPON projects (the Final Reports or the data resulting from the projects) to the tools and vice versa.

TOOL SELECTION WIZARD

Baltic Sea Region Territorial Monitoring System

Baltic Sea Region Territorial Monitoring System ...

CityBench: Urban Benchmarking

Urban Benchmarking - A quick scan tool supporting investment decisions ...

ETMS Tool - European Territorial Monitoring System

Statistical information and practical evidence on territorial trends, dynamics, patterns and structural changes ...

Functional Indicators Tool

Effects of transportation networks on accessibility and the territorial development.

...

ESPOH HyperAtlas

Compare and analyse a region's relative position at european, national and local level ...

ESPOH Online Map Finder

Access to the most relevant ESPON maps.

...

RIMAP Online Mapping tool

Build maps and diagrams at various regional levels ...

ESPON Toolbox Survey results (2017)

Q4 Which ESPON tool are you most familiar with?

Answered: 54 Skipped: 2

Q75 What do you normally search for when using online tools? Not more than 2 answers.

Answered: 41 Skipped: 15
