Austrian Spatial Development Concept (ÖREK)

- Policy Paper jointly developed and politically agreed by the members of ÖROK
- Long-term strategy for spatial development policies in Austria
- Guideline and strategic management instrument for spatial planning and development at national level
- **Starting Point ÖREK 2011: mission statement** with an **action programm** for 10 years
 - Definition of an accompanying process
 - from „document“ towards „implementation“
 - Concretisation and "implementation“ with ÖREK-partnerships
 - Evaluation 2018 → Update towards ÖREK 2030

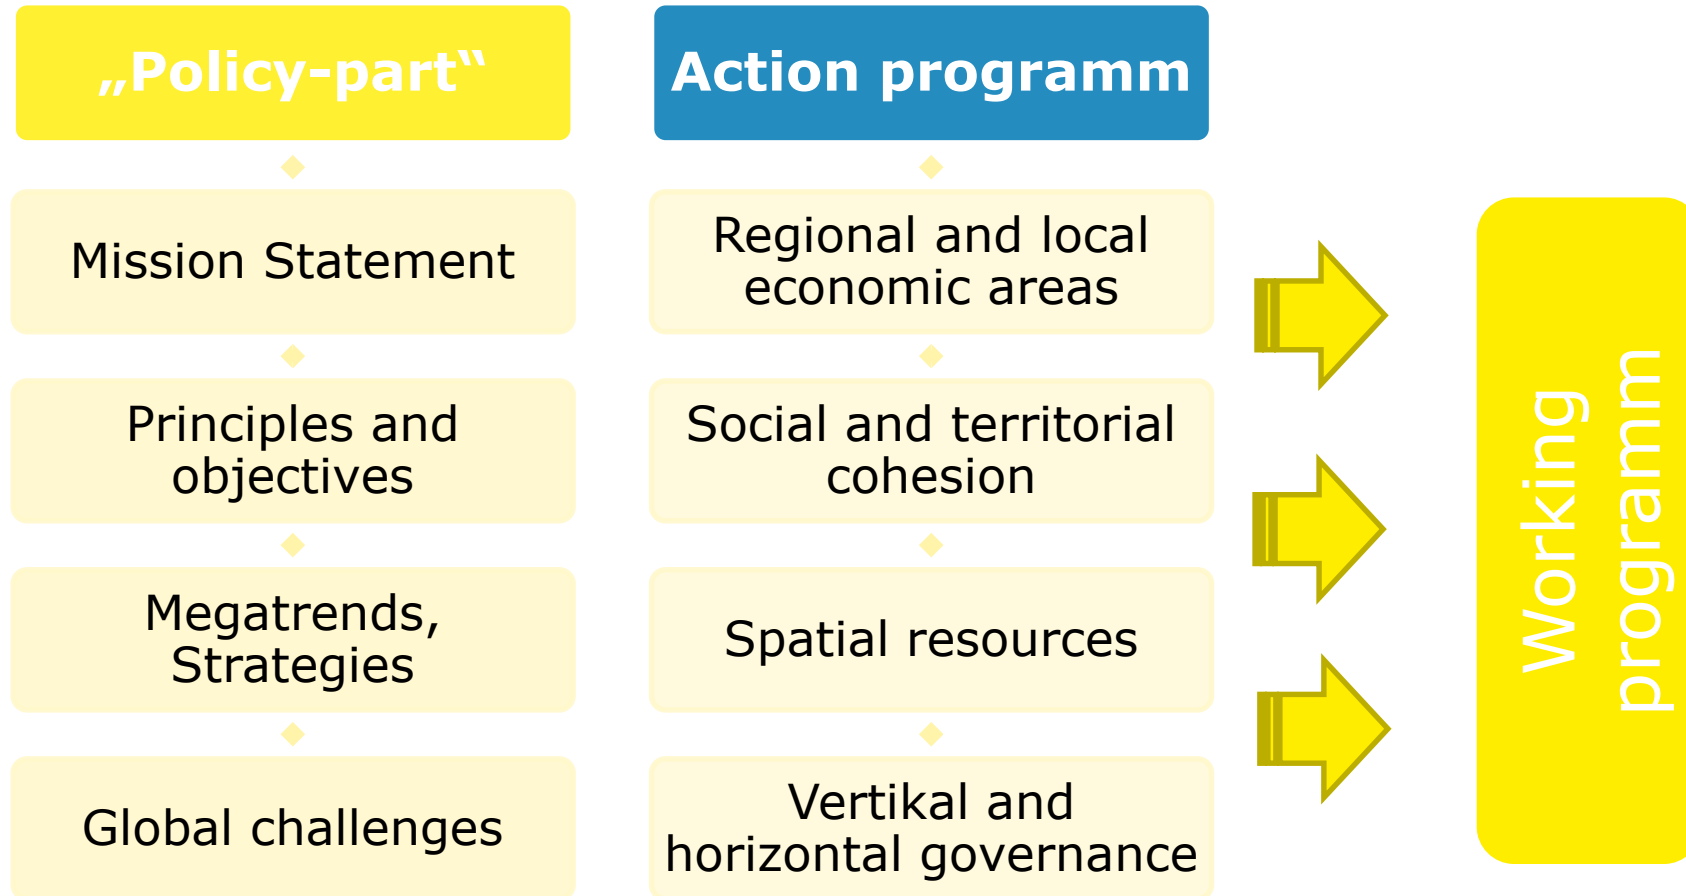

ÖREK 2030 – Mission and focus

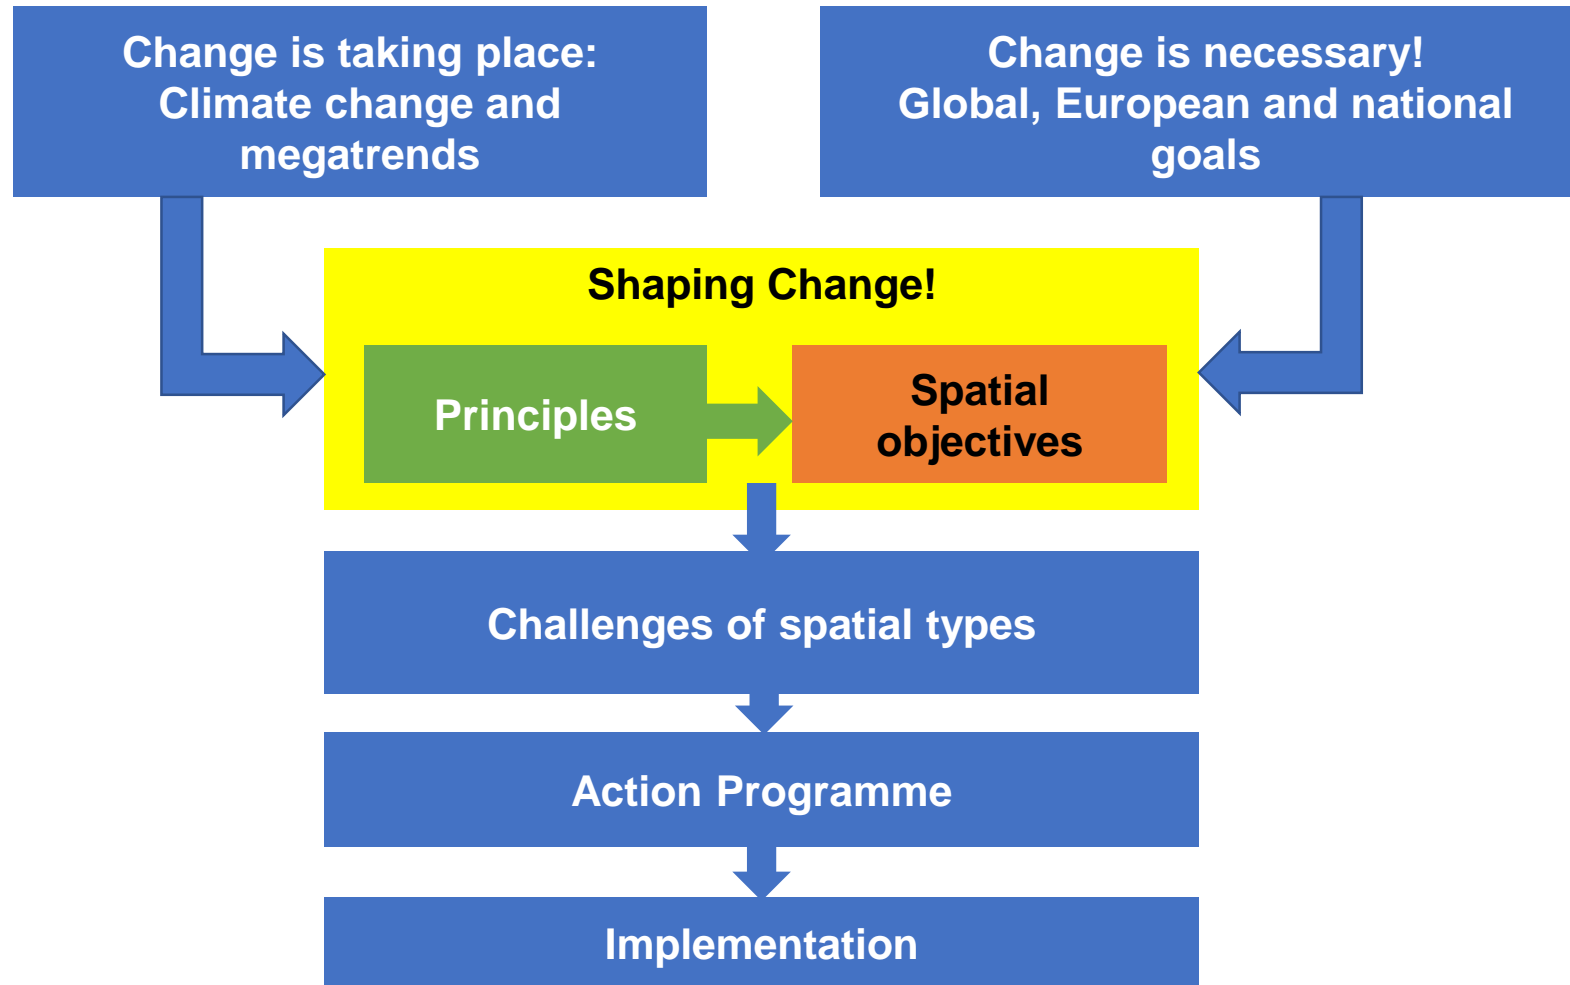

- Contributions and responses of spatial planning towards climate change adaptation and mitigation and sustainable development
- Focus on transformation processes to achieve the goals of climate protection and decarbonization
- Challenges specific to spatial types of Austria
- Reference to European spatial and urban development strategies and UN Agenda 2030
- Further increasing the implementation orientation and effectiveness of ÖREK 2030, e.g. Taking up already existing ÖROK results, targeted analysis of actors and instruments, creation of an implementation programm, communication,

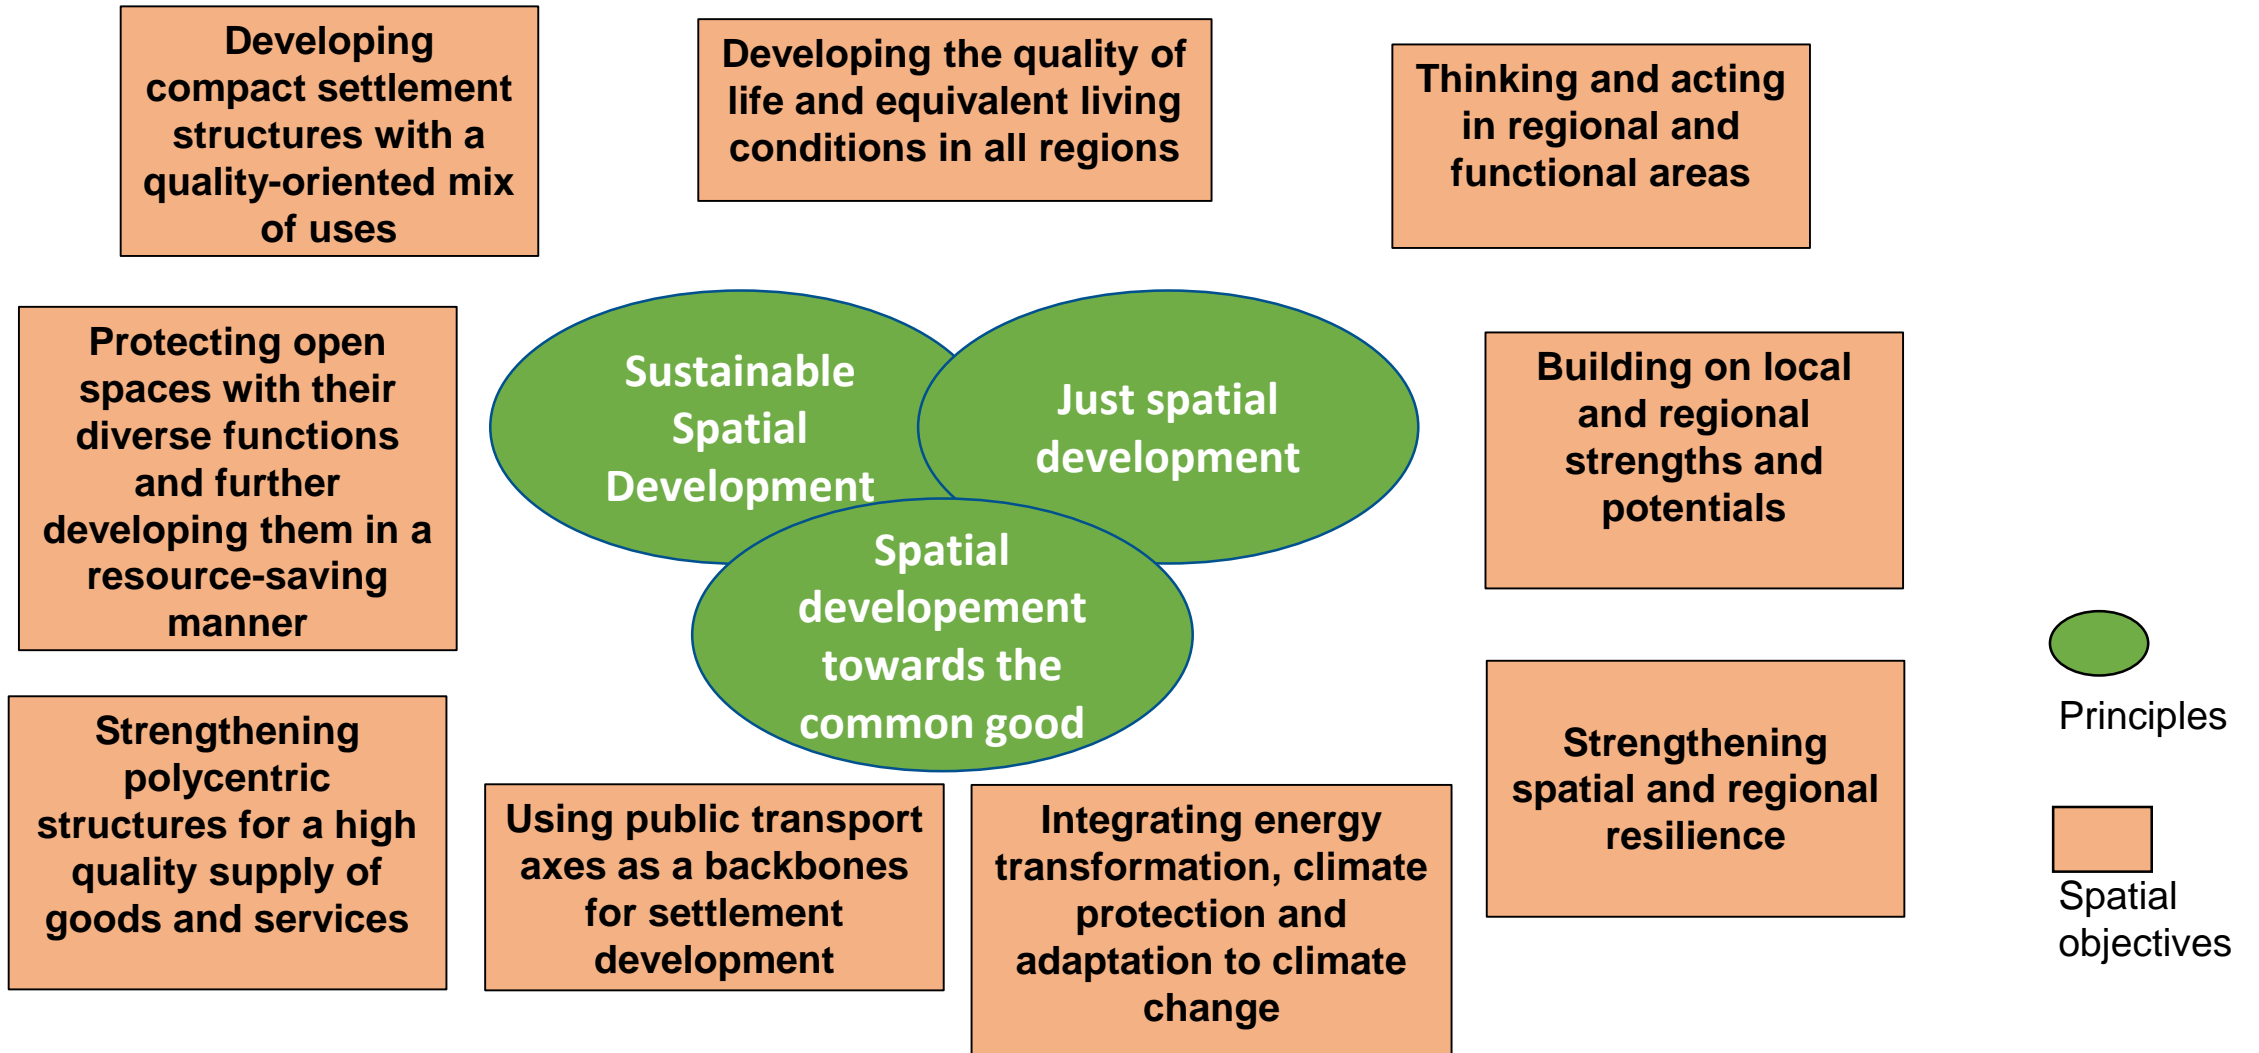

Structure of ÖREK 2030

Philosophy of ÖREK 2030

Shaping Change! Principles and spatial objectives of ÖREK 2030

Spatial Types of ÖREK 2030

Challenges specific to spatial types of Austria:

- **Larger urban regions:** Vienna and provincial capitals with their urban hinterland and rural interlinked communities
- **Smaller urban regions:** district capitals and regional centers with their surrounding rural and interlinked communities
- **Areas along high-level transport infrastructure:** rural communities along railway, express bus corridors and motorways
- **Rural tourism regions**
- **Rural areas with low population density and population decline**

Overview
