MSP-LSI – Maritime spatial planning and land-sea interactions

MSP-LSI

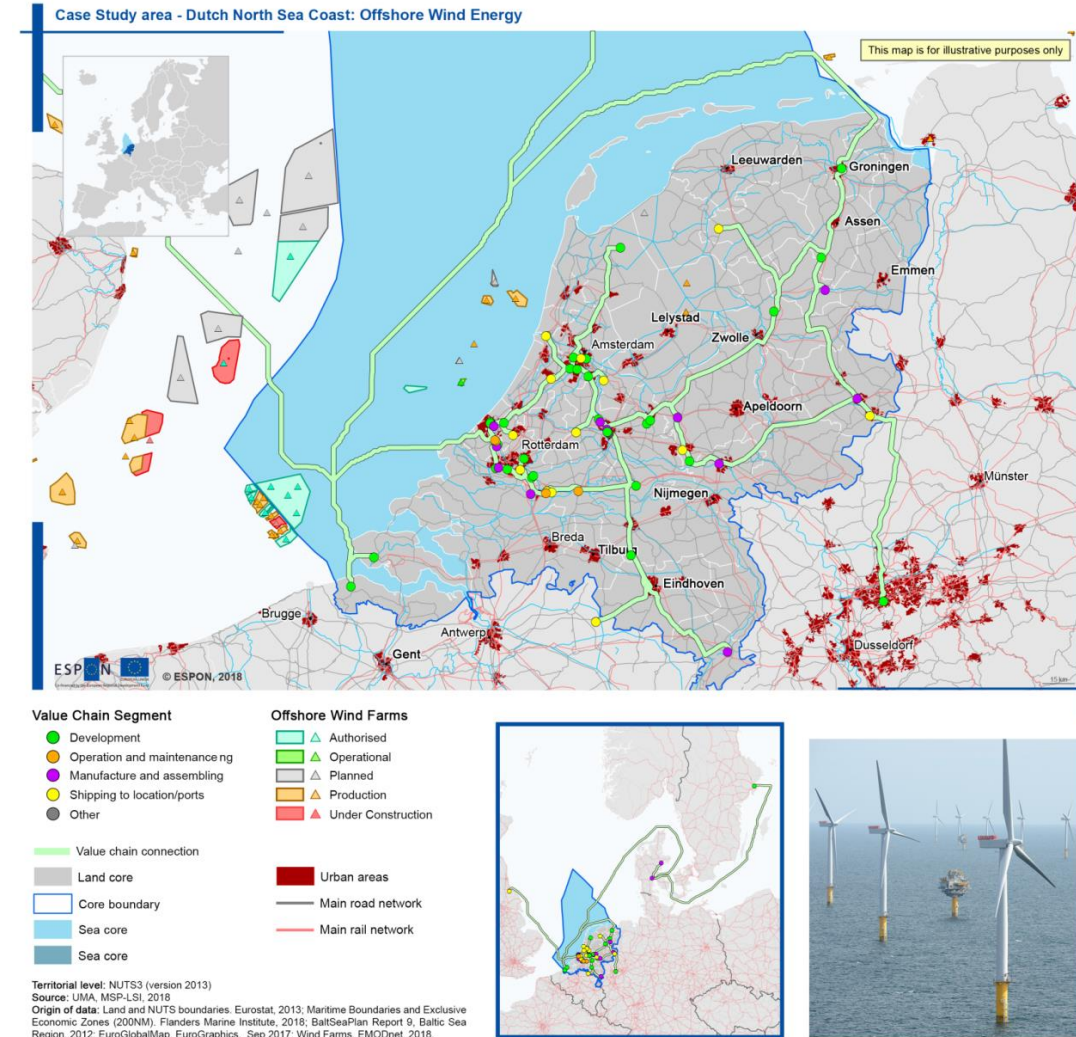

1. What are the main impacts of maritime activities and maritime spatial planning on land?
2. How can terrestrial spatial planning consider them?

What are the main impacts of maritime activities and maritime spatial planning on land?

Dutch North Sea Coast Offshore Wind Energy Example

- Coastal, regional, national, international employment and GVA
- Requiring complementary seaward and landward infrastructure
- Strategic element in national/EU transition to low carbon future
- Wider North Sea could provide 12%+ of the EU's electricity by 2030
- MSP key part of framework conditions guiding sector development

How can terrestrial spatial planning consider them?

A method for exploring LSI
